1.

Executive Summary

This project delivers a comprehensive, enterprise-grade Sales Analytics Dashboard built on Microsoft Power BI, designed to serve large-scale industrial organizations. The solution consolidates every dimension of sales operations from high-level revenue tracking to granular rep-level performance into a single, unified, multi-page intelligence platform.

Leveraging industry-standard UX principles, advanced DAX measures, and real-time data connectivity, this dashboard eliminates the need for siloed reports across departments. C-suite executives, regional managers, sales reps, and financial analysts will each find their specific insights within the same report file, secured by Row-Level Security.

This document is the complete developer reference covering all 12 page specifications, KPIs, chart types, layout zones, data model, security, and a 7-week delivery timeline. Build each page exactly as specified to achieve the intended enterprise UX.

2.

Project Overview & Objectives

Attribute	Detail
Primary Goal	Unified sales intelligence for enterprise-scale operations
Target Users	CEO, CFO, Sales Managers, Regional Heads, Sales Reps, Analysts
Platform	Microsoft Power BI (Desktop + Service + Mobile)
Data Sources	ERP (SAP/Oracle), CRM (Salesforce/Dynamics), SQL DB, Excel
Refresh Cycle	Real-time DirectQuery + Scheduled (hourly/daily)
Pages Count	12 fully designed pages + 1 navigation hub
Security	Row-Level Security (RLS) by region / team / role
Deployment	Power BI Service — Workspace + App distribution
Timeline	~7 weeks across 6 phases

3. Technology Stack & Architecture

- **Power BI Desktop:** Report authoring, DAX measures, custom visuals, bookmarks, drill-through
- **Power BI Service:** Cloud publishing, scheduled refresh, RLS enforcement, sharing & collaboration
- **Power Query (M):** ETL transformations, data shaping, merging multiple source tables
- **DAX:** Advanced KPI calculations, time intelligence, running totals, YoY/MoM comparisons
- **DirectQuery / Import:** Hybrid mode real-time tables via DirectQuery, aggregates via Import
- **Power BI Mobile:** Mobile-optimized layouts for field sales reps and executives on-the-go
- **Azure AD / RLS:** Role-based row-level security, SSO integration, embedded analytics support

4. Dashboard Pages — Detailed Breakdown

Each page is a self-contained analytical view with cross-page filter propagation, drill-through capability, and bookmark-based navigation. All pages share a consistent header, global slicer panel, and color theme. Below is the full specification for every page including KPIs, chart types, and layout zones.

4.1 Page 1 — Executive Summary Dashboard

Page 1 — Executive Summary Dashboard	
Description	The C-suite landing page providing a single-glance overview of the entire business. Acts as the navigation hub with bookmark buttons linking to all other pages. Designed for senior leadership who need the complete picture in under 30 seconds.
Key KPIs	Total Revenue • Revenue vs Target • Gross Margin % • YoY Growth • MoM Growth • Total Orders • Avg Order Value • Customer Count • New vs Returning
Visuals	KPI Card Row (9 cards) • Revenue Trend Line (12-month) • Target vs Actual Gauge • Top 5 Products Bar Chart • Region Map Bubble • Quick Nav Buttons Grid
Layout	• TOP HEADER BAR (50px): Page title 'Executive Overview' Date context chip Export button • LEFT FILTER PANEL (200px, collapsible): Date range slicer Region dropdown Channel toggle • KPI ROW (top 110px of canvas): 9 metric cards in a horizontal row each card shows current value, trend arrow, and sparkline • CENTER-LEFT (60% width, 300px): 12-month Revenue Trend Line Chart with target line overlay • CENTER-RIGHT (40% width, 300px): Gauge chart (Revenue vs Target %) + Top 5 Products bar chart stacked vertically • BOTTOM NAVIGATION GRID (120px): 12 bookmark buttons one per page styled as icon tiles • FOOTER BAR (40px): Last refresh timestamp Page 1 of 12 indicator

4.2 Page 2 — Sales Performance Overview

Page 2 — Sales Performance Overview	
Description	Comprehensive view of sales performance across all dimensions time, product, region, and channel. Primary working page for Sales Directors and VPs to track achievement against targets and identify trends requiring immediate attention.
Key KPIs	Sales Achievement % • Quota Attainment • Win Rate • Deal Velocity • Pipeline Coverage • Avg Deal Size • Sales Cycle Length
Visuals	Achievement % Gauge • Monthly Sales Bar + Line Combo • Sales by Channel Donut • Waterfall: Budget vs Actual • Sales Rep Scatter Plot • Period Slicer
Layout	• TOP HEADER BAR (50px): 'Sales Performance' Breadcrumb Period label chip • LEFT FILTER PANEL (200px): Date slicer Region multi-select Sales Rep dropdown Channel radio • KPI ROW (110px): 7 metric cards — Achievement %, Quota Attainment, Win Rate, Deal Velocity, Pipeline Coverage, Avg Deal Size, Cycle Length • LEFT MAIN CHART (60%, 320px): Monthly Sales Bar Chart with Target Line overlay (combo chart) • RIGHT TOP (40%, 160px): Achievement % Gauge chart • RIGHT BOTTOM (40%, 160px): Sales by Channel Donut chart • BOTTOM FULL-WIDTH (180px): Waterfall chart showing Budget vs Actual deviation by month

4.3 Page 3 — Revenue & Profitability

Page 3 — Revenue & Profitability	
Description	Deep-dive into revenue streams and profitability metrics. Finance teams and CFOs use this page to track gross margin, COGS, discounting impact, and net revenue across product lines and customer segments. Fully time-intelligent with YoY/QoQ breakdowns.
Key KPIs	Gross Revenue • Net Revenue • COGS • Gross Profit • Gross Margin % • Discount % • Revenue per Customer • EBITDA Contribution
Visuals	Revenue vs Profit Line Chart • Margin Waterfall by Product • COGS Breakdown Pie • Discount Impact Analysis Bar • Profitability Matrix Table • YoY Variance Card
Layout	• TOP HEADER BAR (50px): 'Revenue & Profitability' Currency toggle (Local / USD) YoY Variance badge • LEFT FILTER PANEL (200px): Date slicer Product Category Customer Segment Currency toggle • KPI ROW (110px): 8 metric cards with color-coded thresholds (green/amber/red) • LEFT MAIN CHART (60%, 300px): Revenue vs Gross Profit dual-axis Line Chart (revenue on left axis, margin % on right axis) • RIGHT (40%, 300px): Margin Waterfall chart — shows how revenue becomes gross profit after COGS, discount, returns • BOTTOM LEFT (50%, 200px): COGS Breakdown Pie chart by cost category • BOTTOM RIGHT (50%, 200px): Profitability Matrix table (Product Category vs Region) with conditional formatting

4.4 Page 4 — Product Performance

Page 4 — Product Performance	
Description	Analyzes every product and SKU across multiple dimensions — revenue contribution, sell-through rate, margin, returns, and lifecycle stage. Product managers and category heads use this to identify hero products, sunset underperformers, and optimize the product mix strategy.
Key KPIs	Units Sold • Revenue per SKU • Product Margin % • Return Rate • Stock Turnover • Category Share % • Top / Bottom 10 Products
Visuals	Product Revenue Treemap • SKU Performance Matrix • Category Comparison Bar • Product Lifecycle Bubble Chart • Returns Trend Line • ABC Analysis Table
Layout	• TOP HEADER BAR (50px): 'Product Performance' Category filter chip ABC toggle • LEFT FILTER PANEL (200px): Date Product Category Brand ABC classification filter • KPI ROW (110px): 7 metric cards — Units Sold, Revenue per SKU, Margin %, Return Rate, Stock Turnover, Category Share, New Products count • LEFT MAIN CHART (60%, 280px): Treemap showing Revenue by Product Category (size = revenue, color = margin %) • RIGHT (40%, 280px): Category Comparison Bar chart sorted by revenue descending • BOTTOM LEFT (50%, 220px): Product Lifecycle Bubble Chart (x=revenue, y=growth rate, size=units sold) • BOTTOM RIGHT (50%, 220px): ABC Analysis table — classify SKUs by revenue contribution with color bands

4.5 Page 5 — Regional & Territory Analysis

Page 5 — Regional & Territory Analysis	
Description	Geographical intelligence layer showing sales performance across regions, territories, cities, and districts. Regional sales managers use this page to benchmark territories, identify growth pockets, and allocate resources effectively with map-based visualizations.
Key KPIs	Regional Revenue • Territory Quota % • Market Penetration % • Geo Growth Rate • Territory Rank • Coverage Index
Visuals	Filled Map (Regional Heat) • Territory Drill-Down Map • Region vs Target Bar • State/City Table with Sparklines • YoY Growth by Region Matrix • Territory Performance Scatter
Layout	• TOP HEADER BAR (50px): 'Regional Analysis' Zoom-to-Region button Level toggle (Region / Territory / City) • LEFT FILTER PANEL (200px): Date Region multi-select Territory Product Category • KPI ROW (110px): 6 metric cards — Regional Revenue, Territory Quota %, Market Penetration, Growth Rate, Territory Rank, Coverage Index • LEFT MAIN MAP (55%, 380px): Azure Maps filled choropleth map — color intensity = revenue; click drills to territory level • RIGHT TOP (45%, 200px): Region vs Target Horizontal Bar chart • RIGHT BOTTOM (45%, 180px): Territory Performance Scatter (x=quota attainment, y=growth rate, size=revenue) • BOTTOM FULL-WIDTH (180px): State/City table with sparkline columns for 12-month trend, sortable by region

4.6 Page 6 — Customer Intelligence

Page 6 — Customer Intelligence	
Description	360-degree customer analytics covering acquisition, retention, lifetime value, segmentation, and churn risk. Sales and CRM teams use this to prioritize accounts, identify at-risk customers, and discover upsell/cross-sell opportunities across the entire customer base.
Key KPIs	Customer LTV • Churn Rate % • Customer Acquisition Cost • NPS Score • Repeat Purchase Rate • Avg Revenue per Customer • Customer Health Score
Visuals	Customer Segment Donut • LTV vs CAC Scatter • Churn Risk Cohort Table • Top 20 Customers Bar • Purchase Frequency Histogram • Customer Journey Funnel
Layout	• TOP HEADER BAR (50px): 'Customer Intelligence' Segment filter chip Health Score legend • LEFT FILTER PANEL (200px): Date Customer Segment Region Churn Risk band • KPI ROW (110px): 7 metric cards — LTV, Churn Rate %, CAC, NPS, Repeat Rate, Avg Revenue, Health Score • LEFT MAIN CHART (55%, 300px): LTV vs CAC Scatter plot (bubble size = revenue, color = churn risk tier) • RIGHT TOP (45%, 150px): Customer Segment Donut chart • RIGHT BOTTOM (45%, 150px): Customer Journey Funnel (Prospect → Active → Loyal → At-Risk → Churned) • BOTTOM LEFT (50%, 200px): Top 20 Customers Horizontal Bar chart with revenue and LTV labels • BOTTOM RIGHT (50%, 200px): Churn Risk Cohort table with conditional color coding (red = high risk)

4.7 Page 7 — Sales Pipeline & Funnel

Page 7 — Sales Pipeline & Funnel	
Description	Real-time CRM pipeline intelligence. Sales managers track every deal from lead to close, monitor conversion rates at each stage, identify bottlenecks, and forecast close probability. Integrates directly with Salesforce or Dynamics 365 via DirectQuery for live data.
Key KPIs	Pipeline Value • Weighted Pipeline • Stage Conversion % • Avg Days in Stage • Win Rate % • Lost Deal Analysis • Pipeline Velocity • Deals at Risk
Visuals	Funnel Chart (Stage-by-Stage) • Pipeline by Rep Stacked Bar • Deal Age vs Value Bubble • Stage Movement Sankey • Close Date Calendar Heatmap • Win/Loss Reason Donut
Layout	• TOP HEADER BAR (50px): 'Sales Pipeline' Live data indicator (DirectQuery badge) Forecast period selector • LEFT FILTER PANEL (200px): Date (expected close) Sales Rep Stage Deal Size range slider • KPI ROW (110px): 8 metric cards — Pipeline Value, Weighted Pipeline, Stage Conversion, Days in Stage, Win Rate, Deals at Risk, Velocity, Avg Deal Size • LEFT MAIN CHART (60%, 300px): Horizontal Funnel chart showing deal count and value at each pipeline stage • RIGHT (40%, 300px): Pipeline by Rep Stacked Bar chart — each bar = rep, segments = stage • BOTTOM LEFT (50%, 200px): Deal Age vs Value Bubble chart — older high-value deals highlighted in red • BOTTOM RIGHT (50%, 200px): Win/Loss Reason Donut chart with top 5 loss reasons labeled

4.8 Page 8 — Sales Team Performance

Page 8 — Sales Team Performance	
Description	Individual and team-level performance management page. Sales managers and HR use this to track rep performance, quota attainment, activity metrics, and coaching needs. Designed with fairness — benchmarks each rep against peers and quota targets, not just absolute numbers.
Key KPIs	Rep Revenue • Quota Attainment % • Calls Made • Meetings Held • Demos Delivered • Proposals Sent • Deals Closed • Activity Score
Visuals	Rep Leaderboard Table • Quota Attainment Bullet Chart • Activity Radar Chart • Team vs Individual Line • Performance Band Matrix • Rep Trend Sparkline Table
Layout	• TOP HEADER BAR (50px): 'Team Performance' Period selector Team vs Individual toggle • LEFT FILTER PANEL (200px): Date Region Team Individual Rep selector • KPI ROW (110px): 8 metric cards — Rep Revenue, Quota %, Calls, Meetings, Demos, Proposals, Closed, Activity Score • TOP-LEFT MAIN (60%, 160px): Quota Attainment Bullet Chart — each rep shown as a horizontal bullet bar (actual vs target vs stretch) • TOP-RIGHT (40%, 160px): Activity Radar Chart — selected rep's activities across 6 dimensions • BOTTOM-LEFT (60%, 240px): Rep Leaderboard Table with columns: Rank, Name, Revenue, Quota %, Deals, Activity Score; sortable • BOTTOM-RIGHT (40%, 240px): Performance Band Matrix — reps classified in 4 quadrants (high revenue + high activity = star; etc.)

4.9 Page 9 — Inventory & Supply Chain

Page 9 — Inventory & Supply Chain	
Description	Links sales data with inventory and supply chain metrics to prevent stockouts and overstock situations. Operations and supply chain managers use this to align demand signals with inventory levels, track supplier performance, and optimize reorder points based on actual sales velocity.
Key KPIs	Stock Level • Days of Inventory • Reorder Point • Stockout Rate • Inventory Turnover • Supplier Lead Time • Demand Forecast Accuracy
Visuals	Inventory Level Gauge • Stock vs Sales Dual-Axis • Reorder Alert Matrix • Supplier Performance Table • Demand vs Supply Waterfall • SKU Velocity Classification
Layout	• TOP HEADER BAR (50px): 'Inventory & Supply Chain' Alert badge (stockout warnings count) Refresh timestamp • LEFT FILTER PANEL (200px): Date Product Category Warehouse/Location Alert type filter • KPI ROW (110px): 7 metric cards — Stock Level, Days of Inventory, Reorder Point, Stockout Rate, Turnover, Lead Time, Forecast Accuracy • LEFT MAIN CHART (55%, 300px): Stock vs Sales Dual-Axis Line chart — stock level (left axis) vs daily sales velocity (right axis) with reorder threshold line • RIGHT (45%, 300px): Demand vs Supply Waterfall chart — shows opening stock, sales, receipts, and closing stock • BOTTOM LEFT (50%, 180px): Reorder Alert Matrix — SKU table showing current stock, reorder point, days remaining, color-coded by urgency • BOTTOM RIGHT (50%, 180px): Supplier Performance Table — Lead Time, On-Time %, Defect Rate, Last Order date

4.10 Page 10 — Financial Analytics

Page 10 — Financial Analytics	
Description	Full financial performance view tied to sales outcomes. CFOs and finance teams analyze P&L impact of sales activities, track budget variance, monitor cash flow implications, and generate board-ready financial summaries directly from the dashboard without exporting to Excel.
Key KPIs	Total Revenue P&L • Budget vs Actual Variance • Operating Margin • Cash Conversion Cycle • DSO (Days Sales Outstanding) • Revenue Backlog • Collection Efficiency %
Visuals	P&L Summary Table • Budget Variance Waterfall • Margin Trend Line • Cash Flow Impact Bar • DSO Trend Analysis • Financial KPI Scorecard
Layout	• TOP HEADER BAR (50px): 'Financial Analytics' Currency selector Period (Monthly / Quarterly / Annual) toggle • LEFT FILTER PANEL (200px): Date Business Unit Product Line Currency • KPI ROW (110px): 7 metric cards — Revenue, Budget Variance, Operating Margin, Cash Conversion, DSO, Backlog, Collection Efficiency • TOP FULL-WIDTH (200px): P&L Summary Table — rows: Revenue, COGS, Gross Profit, Operating Expenses, EBITDA; columns: Budget, Actual, Variance \$, Variance % • BOTTOM LEFT (55%, 240px): Budget Variance Waterfall chart by month — green bars above target, red below • BOTTOM RIGHT (45%, 240px): DSO Trend Line + Cash Flow Impact grouped bar chart side by side

4.11 Page 11 — Market & Competitor Analysis

Page 11 — Market & Competitor Analysis	
Description	External intelligence page combining internal sales data with market benchmarks. Strategy and senior leadership teams understand market share position, track competitive win/loss trends, and identify whitespace opportunities. Data fed from market research tools and manual benchmark inputs.
Key KPIs	Market Share % • Competitive Win Rate • Price Index vs Market • Category Growth Rate • Share of Wallet • Competitive Loss Reasons
Visuals	Market Share Donut • Competitive Position Matrix • Win/Loss by Competitor Bar • Price Positioning Chart • Market Trend Line • Whitespace Opportunity Map
Layout	• TOP HEADER BAR (50px): 'Market & Competitor Analysis' Data source label ('Market Research — Q2 2025') Refresh note • LEFT FILTER PANEL (200px): Date Category Geography Competitor selector (multi-select) • KPI ROW (110px): 6 metric cards — Market Share %, Win Rate vs Competitors, Price Index, Category Growth, Share of Wallet, Loss Rate • LEFT MAIN (55%, 300px): Competitive Position Matrix — 2x2 quadrant chart (x=price, y=market share); each bubble = competitor • RIGHT TOP (45%, 150px): Market Share Donut — our share vs top 5 competitors • RIGHT BOTTOM (45%, 150px): Win/Loss by Competitor Horizontal Bar chart • BOTTOM FULL-WIDTH (180px): Whitespace Opportunity table — regions/categories where market exists but our penetration is below benchmark

4.12 Page 12 — Forecasting & Predictive Analytics

Page 12 — Forecasting & Predictive Analytics	
Description	AI-powered forecasting page leveraging Power BI's built-in analytics and Azure ML integration. Sales leaders and planners use predictive models for revenue forecasting, quota setting, and demand planning. Includes scenario modeling (optimistic/base/pessimistic) and what-if parameter controls.
Key KPIs	12-Month Revenue Forecast • Forecast Accuracy % • Confidence Interval • Scenario Delta • Seasonal Index • Demand Forecast by SKU
Visuals	AI Forecast Line with Confidence Bands • Scenario Comparison Bar • What-If Parameter Slicers • Forecast vs Actuals Overlay • Seasonal Decomposition Chart • Model Accuracy Scorecard
Layout	• TOP HEADER BAR (50px): 'Forecasting & Predictive Analytics' Model selector dropdown (Linear / Seasonal / Azure ML) Confidence level toggle • LEFT FILTER PANEL (200px): Forecast horizon (3/6/12 months) Product Category Region Scenario (Optimistic / Base / Pessimistic) • WHAT-IF PARAMETER BAR (60px, below KPI row): 3 interactive sliders — Revenue Growth %, Churn Rate %, New Customer Acquisition Rate — results update all charts live • KPI ROW (110px): 6 metric cards — 12-Month Forecast, Forecast Accuracy, Confidence %, Scenario Delta vs Base, Seasonal Index, Demand Forecast by SKU • MAIN CHART FULL-WIDTH (300px): Forecast Line Chart — historical actuals (solid line) + forecast (dashed line) + shaded confidence band; 3 scenario lines shown simultaneously • BOTTOM LEFT (50%, 200px): Scenario Comparison grouped Bar chart — Optimistic vs Base vs Pessimistic by quarter • BOTTOM RIGHT (50%, 200px): Model Accuracy Scorecard table — MAPE, RMSE, Bias for each forecast model; highlight best model in green

5.

Global Filters & Navigation Design

All 12 pages share a persistent left-side slicer panel (collapsible, 200px wide) containing global filters that propagate across the entire report. This ensures consistent context regardless of which page the user is on. Navigation between pages is done via bookmark buttons on Page 1 or the persistent footer page number strip.

Filter	Applies To
Date Range (Between slicer)	All 12 Pages
Year / Quarter / Month hierarchy	All 12 Pages
Region / Territory multi-select	Pages 1, 2, 5, 8
Product Category / SKU	Pages 1, 3, 4, 9
Sales Rep / Team	Pages 2, 7, 8
Customer Segment	Pages 3, 6
Sales Channel (radio button)	Pages 1, 2, 3
Currency toggle (Local / USD)	All financial pages

6.

Data Model & Relationships

- **Fact Tables:** FactSales, FactPipeline, FactInventory, FactActivities
- **Dimension Tables:** DimDate, DimProduct, DimCustomer, DimRegion, DimSalesRep, DimChannel
- **Schema Type:** Star Schema with Snowflake extensions for Product & Geography
- **Relationships:** All one-to-many from Dimension to Fact; single cross-filter direction
- **Calculated Tables:** DataTable (custom), BudgetBridge, TargetAllocation
- **Key DAX Measures:** Revenue YTD, Margin %, YoY Growth, Rolling 12M, Forecast Variance, RLS Filter

7.

Security & Row-Level Access (RLS)

Role	Access Scope
Global Admin / CEO	All regions, all teams, all data — no filter applied
Regional Director	Own region only — all teams within that region
Area Sales Manager	Own area / district — all reps under them
Sales Representative	Own deals, own customers, own pipeline only
Finance Analyst	Financial pages only — no rep-level personal data
Read-Only Executive	All data — view only, export disabled

8.

Project Timeline & Deliverables

Phase	Activities	Duration	Deliverable
Phase 1: Discovery	Stakeholder interviews, KPI definition, data source mapping	1 Week	Requirements Doc
Phase 2: Data Model	Source connections, Power Query ETL, star schema build	1.5 Weeks	Data Model (.pbix)
Phase 3: DAX & Measures	KPI measures, time intelligence, forecast models, RLS	1 Week	Measures Library
Phase 4: Dashboard Build	All 12 pages — design, layout, visuals, custom themes	2 Weeks	PBIX File v1
Phase 5: Testing & UAT	User acceptance testing, bug fixes, performance tuning	1 Week	QA Sign-off
Phase 6: Deployment	Publish to Power BI Service, app setup, user training	3 Days	Live Dashboard
TOTAL		~7 Weeks	Production Dashboard

9.

Layout Wireframe — Standard Page Template

Every page follows a consistent 3-zone layout. The developer must replicate this template across all 12 pages and override only the content zones with page-specific visuals. Global zones (header bar, filter panel, footer) remain identical on all pages.

Zone	Dimensions	Content / Notes
Top Navigation Bar	Full width × 50px	Logo Page Title Breadcrumb User Info chip Export button Bookmark nav icons
Global Filter Panel (Left)	200px wide × full remaining height	Collapsible panel: Date range slicer Region Product Rep Channel Currency toggle
KPI Cards Row	Remaining width × 110px (top of canvas)	4 to 9 metric cards in horizontal row; each card: label (top, 12px), value (24px bold), trend arrow + sparkline (bottom)
Primary Chart Area (Left 60%)	60% of canvas width × 280–320px	Main analytical visual — specific chart type defined per page above
Secondary Chart Area (Right 40%)	40% of canvas width × 280–320px	Supporting visual — donut / gauge / bar / scatter — specific per page
Detail Table / Matrix (Bottom)	Full width × 180–220px	Drill-through enabled data table with conditional formatting, sort headers, and search box
Page Navigation Footer	Full width × 40px	Page number buttons (1–12) Last refresh timestamp 'Back to Overview' link

Project Sign-off Statement

This proposal represents a complete enterprise-grade Power BI Sales Analytics solution. All 12 pages are designed to market standards with full UX consistency, proper data modeling, and role-based security. This dashboard will serve as the single source of truth for all sales-related decision making across the organization. The developer must follow all layout zones, KPI definitions, and visual specifications exactly as described in this document.
